

HARBOR TOWN PLACE MIXED USE DEVELOPMENT

CLIENT: Ridge Stone Builders

LOCATION: State Route 25 (Dixie Highway), Perrysburg, Ohio

SERVICES: Construction Engineering, Master Planning, Army Corp of Engineers 401 Permitting Process, Traffic Engineering, Landscape Architecture and Surveying

PROJECT DESCRIPTION

The Master Plan for Harbor Town Place was completed by Feller, Finch & Associates and represents a collaborative effort between the design team and Ridge Stone Builders to provide a one-of-a-kind mixed use development. Located on the south side of Perrysburg, Ohio, Harbor Town Place is designed to give visitors the sense of being in a seaside community. The focal point of the project is the 40' fully operational lighthouse located on a peninsula in the lake near the entrance. The seaside theme is further reinforced through a creative blend of land sculpting, site amenities, streetscaping, landscaping and architectural detailing.

Feller, Finch & Associates also provided site design engineering services for the Retail Strip Center, Harbor Town Senior Housing Residence and the Children's Discovery Center located in Harbor Town Place Development.
