

## HASKINS WASTEWATER TREATMENT PLANT

### VILLAGE OF HASKINS WASTEWATER TREATMENT PLANT

**CLIENT:** Village of Haskins,  
Administrator Colby Carroll 419-823-1911

**SERVICES:** Construction Engineering, Bidding, Grant  
Administration, Inspection and Construction Staking

### PROJECT DESCRIPTION

Haskin's Village New Wastewater Treatment Plant was featured in an Ohio EPA video as a model for infrastructure improvement. The ABJ-Sanitare Treatment Plant serves the rapidly growing residential needs of the Village of Haskins, Ohio. The plant was designed to treat 300,000 gallons per day dry weather flow and up to 1,000,000 gallons per day wet weather flow. The plant features a Huber wedge wire rotary screen, fine bubble diffusers, Aerzen blowers, and Aquionics UV disinfection. The facilities were designed to be easily expandable to accommodate District capacity, yet meet current needs with minimal operational involvement.

### FUNDING

Feller Finch & Associates assisted the Village of Haskins obtain project funding through the Ohio Water Development Authority in the amount of \$3,000,000. The project was also funded by a \$300,000 EPA/ STAG Grant and a \$75,000 OPWC Grant.
